1. Download the file via [nightwatchepilepsy.com/en/update](http://www.nightwatchepilepsy.com/en/update)

Step 2

Find the downloaded file 'NightWatchFwUpd-20220412_v155' on your computer (check your 'Downloads' folder). Double click this file. The application will be installed and you can then open it. Click the little application icon as pictured here on the right.

2. Open the application

Step 3

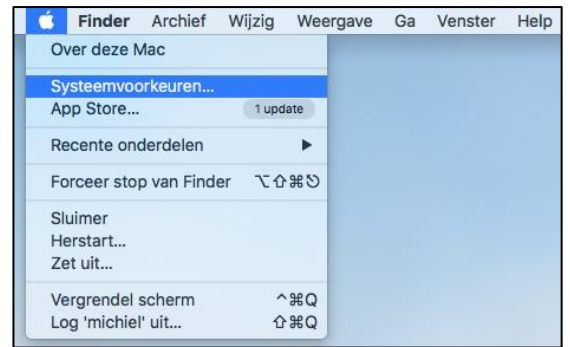

Because the developer of this application is not verified by Apple yet, you will need to surpass some extra security notifications. In order to do this, first click 'OK', then follow the next steps.

3. Click 'OK' for this security notification

Step 4

You now need to confirm that you want to open this application via your 'System preferences'. Click on the 'Apple' icon at the top left of your screen and select 'System preferences...'

4. Click on the little Apple at the top left and then click 'System preferences...'

Step 5

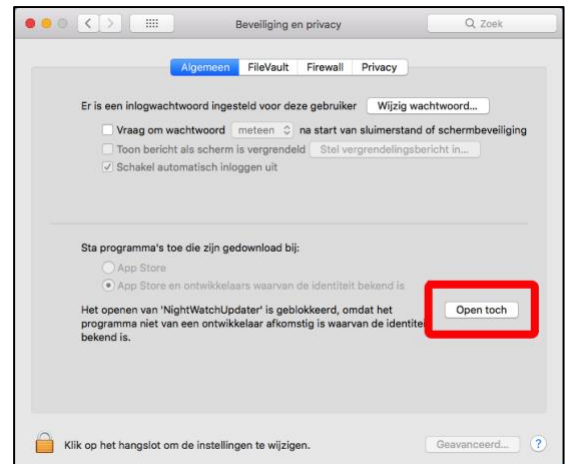

Open 'Security and privacy' (or click 'Back' if another page opens).

5. Open 'Security and privacy'

Step 6

Then click on the button 'Open anyway' in the 'General' tab.

6. Click 'Open anyway'

Step 7

The 'NightWatch Updater' application has now been installed and opened. You can use this application to find and update your NightWatch.

Click 'Info' in the application for more information about this.

7. The application is open. Click 'Info' for more information.
